HOW TO CARE FOR YOUR CANDLE

TREAT YOUR CANDLE WITH
CARE AND LOVE.
THIS WILL ENSURE YOU GET
THE VERY BEST FROM YOUR
CANDLE EACH AND EVERY
TIME YOU LIGHT IT!

BURNING YOUR CANDLE FOR THE FIRST TIME

ALLOW YOUR CANDLE TO
BURN FOR AT LEAST 2
HOURS TO AVOID TUNNELING

THIS IS KNOWN AS A
"CANDLE MEMORY." AND IT
HELPS PREVENT THE CANDLE
FROM TUNNELING OR
CREATING A SMALL, DEEP
WELL IN THE CENTRE AS IT
BURNS. TO CREATE A
CANDLE MEMORY.

TRIMMING THE WICK

A PROPERLY TRIMMED WICK ENSURES AN
EVEN AND CLEAN BURN.

IT WILL INCREASE THE CANDLE LIFESPAN:
BY TRIMMING THE WICK YOU CAN
PREVENT THE CANDLE FROM BURNING
TOO QUICKLY, WHICH CAN SHORTEN ITS
LIFESPAN.

YOU'LL ALSO INCREASE CANDLE LIFESPAN
BY GETTING THE BEST POSSIBLE BURN
FROM THE CANDLE

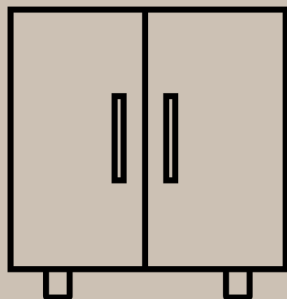

CANDLE STORAGE

STORE THEM IN A COOL, DRY PLACE.
AWAY FROM DIRECT SUNLIGHT AND HEAT
SOURCES.

KEEP THEM IN AN AIRTIGHT CONTAINER OR
RESEALABLE BAG TO PROTECT THEM
FROM DUST AND MOISTURE.

AVOID STORING THEM IN AREAS WITH
HIGH HUMIDITY, AS THIS CAN AFFECT THE
QUALITY OF THE WAX.

LEAVING A CANDLE UNATTENDED

NEVER LEAVE A BURNING CANDLE
UNATTENDED. IF LEAVING A ROOM.

EXTINGUISH ALL CANDLES AND ENSURE
THE WICK EMBER ISN'T GLOWING. NEVER
BURN A CANDLE ON OR NEAR ANYTHING
THAT CAN CATCH FIRE. INCLUDING
FURNITURE, DRAPES, BEDDING AND PAPER

. KEEP LIT CANDLES AWAY FROM
